# kolibri

Exactly your program

Our Kolibri ERP convinces with:

- it is easy to learn, easy to use
- a clear representation of complex production structures in the control center
- an uncomplicated order processing
- a powerful product data and document management system
- quick access to all data. All data is stored in one system
- simple but detailed user authorization concept
- easy expansion of the range of functions as required
- Data backup during operation
- a maintenance-free, license-free database
- a step-by-step, cost-effective introduction thanks to the modular structure
- the continuous adaptation of the software to customer requirements as standard

Our services

We are an international, young & dynamic company with partners from Germany and Switzerland. Specialized in software development and support, with many years of experience in the development of business software, with a focus on ERP*. We have national and international project experience.

This resulted in our fully integrated ERP system Kolibri, with which we offer excellent solutions for the digital change in your company.

As a software company, we at software4.enterprises act in a solution-oriented manner. When dealing with our customers, we rely on individual support right from the start. We make your goals our own and support you efficiently with our products **Kolibri-ERP** and **Kolibri-Web**.

The focus is not on the software, but on the specific processes in your company and its optimization. As a fully integrated ERP system, Kolibri can be customized to a high degree, while still being fully updatable. Once implemented, Kolibri can develop with your company and thus remains an important pillar of your success in the long term.

Rent software instead of buying it!

Use the possibilities of professional business software without having to worry about financing.

Our rental model, tailored to your needs, offers the most modern and cost-effective way of using software.

Your benefits at a glance:

- no capital commitment due to fair rental model
- there is still scope for investments for you
- use of innovative software technologies
- low fixed costs when changing systems
- no additional costs for updates
- calculable costs for server maintenance

Invest your money smart and finance only what you need!

Kolibri, the clever alternative

- optimized and simplified procurement and provision of goods
- more precise planning and better utilization in production thanks to the graphic control center
- more overview through demand planning
- an orderly and clear warehouse
- automated transfer of data from construction
- simple time tracking, both for access, in production and also for tasks
- more transparency and more success in sales
- Web connection for sales and support
- Online spare parts catalogue, online shop

Kolibri, far more than just an ERP system
